LOGAN, CACHE COUNTY, UTAH THURSDAY MARCH 9 1916

FOURTEENTH YEAR

Scientific Management Necessary to Restore and Protect U. S. Forests

The forests of the United States are being consumed more than three times as rapidly as they are growing, not taking into consideration the immense loss by forest fires. This is the message given to the world in a striking manner by the United States government forest service exhibit at San Diego's 1916 Exposition. The display is the first to be completed of the government's 18,000 square feet of exhibits being housed in three Exposition buildings.

Sixty-five per cent of every tree cut in the United States forests is wasted and the greater part of this waste is avoidable.

These things, which are brought to the attention of San Diego visitors, are more appalling when it is realized that the United States forest area is decreasing while the population increases.

The government exhibit shows two things to be necessary: first the introduction of scientific management in the forests and second the reduction of waste in the utilization of wood. Through scientific management, the government experts hold that the forests may be made to produce three or four times as much timber as when left to nature and this by improving rather than destroying the forests.

Scientific logging and the reduction of waste by the introduction of improved methods and the manufacture of byproducts are the striking features of the Exposition exhibit.

The problem of the scientific handling of woodlands is presented by three models at San Diego, each four feet square, showing an acre of western yellow pine. The central model shows the acre in virgin condition ready for logging. Model No. 2 shows the acre as it would appear after it has been logged under government regulation on a National

forest with stumps cut low, logs cut from high into the tree tops, young growth protected, brush piled for burning, and a future forest insured.

The third model shows the acre logged by wasteful methods. Stumps are high, large tops are left unused many logs are shattered by careless felling, young trees are broken by old ones falling upon them or have been felled, dead trees have been left standing and the brush lies where it fell constituting a fire menace.

Wood waste and its utilization is covered at the Exposition display by a series of nine models. Five of these show the progress of wood from the forest, through the saw mill and the planing mill, to the finished house, and tells the waste in each step. The other four models placed alongside are of a paper making machine, a wood distillation plant, a wood working factory, and a tannic extract plant. They bear the labels suggesting that much wood waste can be utilized in the manufacture of such byproducts as paper, alcohol, tannic acid, acetate of lime, acetone, turpentine, rosin, and oxalic acid, and many wooden commodities such as tool and brush handles, rollers, gun stocks and bobbins. Above the case containing these models is a frieze upon which are displayed many of these commodities, and the waste material from which they can be made.

The Exposition exhibit also contains charts and maps and many beautifully colored transparencies showing forests throughout the country, and activities upon the National forests. To house the government display a new building is under construction in addition to the two now in use.

Formal dedication of the 1916 exposition is March 18.

HIGH SCHOOL BOYS ENTERING UPON PREPAREDNESS WORK WITH ENTHUSIASM

Photos by American Press Association.

Throughout the country, while some college presidents are discussing pro and con the advisability of introducing military drill into the higher institutions of learning, others, with the principals of high schools, are taking steps to teach their charges the rudiments of military drill. In New York city the Stuyvesant high school students have taken up the subject with enthusiasm, and every Friday afternoon a large body of them assemble in the armory of the Seventy-first regiment for instruction by Captain Albert T. Rich, United States army. The pictures show Captain Rich and students to whom he is teaching the use of the military rifle.

UTAH SENATOR STANDS BEHIND PRES. WILSON

Desires Peace, But Would Protect the People. Junior Member From Utah Speaks

Washington, March 7.—Discussing the armed ship issue in the senate today Senator Sutherland of Utah, a Republican member of the foreign relations committee, stood squarely behind President Wilson in his policy in dealing with Germany in the submarine negotiations.

"I do not want war at any time," said Senator Sutherland, "and I pray God that it may not come now, but I would rather have war with all its sacrifices and suffering than that this nation, with its long history of heroism and glory, should play the poltroon when confronted by a supreme national duty, because it places greater value upon its case than upon its honor."

"I am one of those who desire peace," the senator continued, "but a nation, when all other means fail, that will not resent a flagrant and illegal attack upon the lives of its own citizens is only less detestable than a man who will not fight for his wife and children. And, believing as I do about that, if the life of an American citizen is again taken by the illegal and deliberate sinking without warning of a merchant ship, unarmed or armed only for defense, that this government should hold the offending nation to a stern reckoning, I shall never give my consent to the issuance of a formal and official notice such as has been proposed which if not heeded, would, without minimizing our duty in the least, have the effect of embarrassing and weakening our moral standing if we should once more be under the sad necessity of seeking reparation for the destruction of the lives of our people."

Status of Armed Ships

Senator Sutherland in discussing the legal status of armed merchant ships under international law and the relation thereto of the submarine, contended that the submarine must yield to the law and not the law to the submarine. If the law yields to the submarine, he said, and allows the underwater boat to sink vessels armed defensively only without warning and without giving passengers and crew a chance to get to a place of safety, it will be inviting the sinking of unarmed ships as well, since he said, "It is well nigh impossible for the officers of a submarine to determine in advance whether a given vessel is armed or not. The result will be that unarmed vessels while possessing immunity in theory will have none in fact."

Right of Citizens to Travel

"The question next arises—and, indeed, it is really the crucial question—shall our citizens be officially advised to forbear from traveling on belligerent merchant vessels armed for defense only? Or, indeed, shall we go further and for bid their doing so under penalty for disobedience? If I am correct in what I have already said, namely, that these merchant ships have the right to carry defensive armament, it follows that such a ship has the same status as though unarmed and that the right of a neutral citizen to transport his goods or travel upon either is the same and not a different right and that, in fact, is the decision of our own supreme court in a great case decided many years ago and never since overruled or modified."

"If, therefore a citizen take passage upon a ship so armed and lose his life by the sinking of the ship without warning, what must be the contention and claim of this government? To my mind clearly this: That the citizen in the exercise of a clear right has been deprived of his life by the deliberately illegal act of the belligerent government which sent the submarine on its mission of death."

Senator Sutherland also opposed any change in the rule with respect to the sale of munitions of war or arming merchant ships for defense, asserting that any such changes now would be an unneutral act.

Ogden Packing and Provision Company To Add Stockyards

Ogden, March 7.—Improvements of the Ogden Packing and Provision company's plant on West Twenty-fourth street, involving an expenditure of \$100,000 and the organization of the Ogden Union stockyards with a capital of \$250,000 of which \$100,000 is to be expended immediately, has been authorized by the principal stock holders of the company. Modern stockyards will be built on the 70 acres of ground west of the company's plant, across Weber river. Additions to the local plant include an "L" building 100 feet by 100 feet, which will be larger than the present building. The capacity of the plant will be increased three fold in the output of pork products.

It is expected that an architect will be here from Chicago sometime this week to plan the new building. Work on the stockyards is to begin before the end of the week. The entire area will be covered with concrete floors as a sanitary measure and the latest improvements will be made part of the enclosures.

When completed the packing houses and yards will give employment to 500 persons, preparing meats for the market. Stockbuyers, representing all the large packers in the United States, will make this their headquarters. It is anticipated that within the next two years 1000 persons will be employed and street cars will be run in the district of the plant.

The plant's capacity will be increased to provide for the slaughtering and dressing of 1000 hogs, 1500 sheep and 300 cattle each working day. This amount of stock means that 47 cars will be required daily and a corresponding amount of dressed meats will be sent out. The new building will have five stories with annexes. One department will be devoted entirely to hogs. The plans are to be sent to the bureau of animal industry at Washington for approval.

Important Musical Event at Tabernacle Tomorrow Night

Unusual interest is being centered in the appearance at the Tabernacle tomorrow night, of Charles Wakefield Cadman and Princess Tsalinna Redfeather the Indian mezzo soprano, as the second event of the Artists Concert Series under the management of Fred C. Graham, and the auspices of the Lyceum Committee of the U. A. C. and the B. Y. C. The sale of seats has been going on at the Thatcher Music Co., and indications point to a capacity house. Following is the program as will be rendered:

- Songs—
I Found Him on the Mesa...Cadman
Memories...Cadman
At Dawning (requested)...Cadman
Piano Music—
The Thunderbird Comes From the Cedars (Ms.)...Cadman
Andante con Desiderio (From Sonata in A Major)...Cadman
The Pompadour's Fan (After a Poem by Austin Dobson)...Cadman
Songs—
At Sundown...Lieurance
Invocation to the Sun...Troyer
PART II (The Indian Music Talk—
1. The Old Man's Love Song (Omaha tribal melody recorded by Fletcher and idealized by Arthur Farwell.)
2. Examples of Sacred Music (Primitive) used as an analogy: The Omaha Tribal Prayer (sung in the Indian Tongue); A Gregorian Chant of the Seventh Century (in Latin); An Ancient Coptic Chant (in Arabic vowels.)
3. A Demonstration of Involved Rhythms (drum beat with vocal part) using two Omaha ceremonial songs recorded by Miss Fletcher.)
4. Some Songs Built Upon Native Themes:
Blanket Song (Zuni)...Troyer
He Who Moves in the Dew (Omaha)...Cadman
Her Shadow (An Ojibway Canoe Song)...Fred Burton
(Continued on Page Eight)

FIVE DOLLARS FOR YOUR BABY PRIZE WINNER

Why Not Have a Baby Show and Let Someone Get the Money?

John H. Russell, local superintendent for the Metropolitan Life Insurance Company, has been advised by the New York office that his company has decided to cooperate in the Baby Welfare Week which is being conducted in various parts of the country beginning March 4, this action having been undertaken at the request of Miss Julia C. Lathrop, chief of the Children's Bureau of the United States Department of Labor, who has sought the Metropolitan Life Insurance Company's cooperation and assistance.

This company feels that the campaign will do much to reduce deaths among children and to lower the amount of sickness that may lead to serious ailments in later life.

Special baby literature has been prepared by this company for distribution by its agents among policy holders. The company has decided to give a special \$5 prize in gold for the baby selected as prize winner in any and all of the baby contests that might be held in any community.

Here is a good chance for the mothers of Logan to get together, appoint judges, and make a decision as to the best baby in the entire community, and this child will be awarded with a \$5 prize, according to Mr. Russell.

IDAHO MAN CHOSEN TO HEAD DISTRIBUTORS

Spokane, Wash., March 7.—The North Pacific Fruit Distributors, at their annual meeting here today ratified its executive council's plan of reorganization and decided to establish a general eastern sales department at Chicago. J. H. Lowell of Parma, Idaho, was elected president

PUSHING WORK ON BUILDING FOR H. C. CO.

The falling of snow does not seem to interfere with the work on the Shambart-Christiansen building immediately south of the Hotel Logan. Several teams are at work excavating the basement and there is perhaps more life in this particular place than most any other place in town. An order for the steel which is to be used in the erection of the building has been placed and the work is progressing very nicely.

E. C. Varco of Boston representing the Lamson Carrier Company was in Logan this week figuring on the installation of the new carrier system for this new store which will consist of about thirty package carriers and several pneumatic tubes, and will be the most modern carrier system to be found in the country today.

AUTO PLUNGES INTO BAY; ONE PASSENGER DROWNED

San Diego, Cal., March 7.—An automobile carrying eight men, four of them sailors of the United States navy, drove upon a ferry boat here tonight rapidly traversed the deck of the vessel and plunged off the other end into the bay, carrying with it three of its passengers. Benjamin Crockett, formerly associated in sporting ventures with Tex Rickard, and James Coffroth, fight promoters, was drowned. The other two, E. S. Webb, the driver, and Robert Heintz, were rescued. The four sailors and another passenger jumped out of the car as it sped upon the boat. Witnesses said Webb made no attempt to stop the machine.

CHOIR REHEARSAL

The Tabernacle Choir will rehearse on Saturday evening of this week at 8 o'clock. The Tabernacle being otherwise engaged on Friday evening. S. B. MITTON, Director.

SLAUGHTERING CONDITIONS ARE NOT FAVORABLE

Dr. Carroll Advocates Central Killing Station in Cache to Prevent Spreading of Disease

Under the guidance of Superintendent Madsen of the Ogden Packing and Provision Co. at Ogden, twenty students from the Agricultural College, on Monday explored the plant from cellar to garret and were treated to a mixed killing spectacle of sheep, cattle and hogs. A lunch of packing house products was served to the guests at the plant, which consisted of four kinds of sausages, pickled pigs feet and excellent ham. Dr. Carroll who accompanied the students reports it the best meat he ever ate and this was also the opinion of Mr. Sterling Price, teacher in the School for Deaf and Blind, who with two deaf mutes joined the party at the packing plant. On their return to Logan Dr. Carroll gave his students in Animal Husbandry a lecture on the defects of the slaughtering conditions of Cache Valley, contrasting them very unfavorably with those of Ogden. In his talk Dr. Carroll showed the impossibility of not spreading disease in using the meat under the present methods and advocates a central slaughtering plant for the valley.

MARRIAGE LICENSES

Marriage licenses have been issued to the following couples during the week:

Edward J. Hoskin of Wellsville, and Maggie Clifford of Millville.
Carence P. Bird and Ina Sorenson, both of Mendon.
Fred K. Smith and Bertha Gilgen, both of Daniels, Idaho.
Elmer Hatch and Ruby Boyd, both of Oxford, Idaho.
Charles L. Nelson and Florence J. Burgess, both of Smithfield.
Peter Jensen and Katie Schenk, both of Lund, Idaho.
